

Phylogenetic tree showing relationships between various plant species. The tree is rooted on the left and branches out extensively to the right. It includes numerous species names, such as ILEX, YUOM, FCCA, JSZD, VCCF, etc., and is annotated with bootstrap values at various nodes. The tree is divided into several major clades, including Rosids, Malvaceae, and others. The species names are listed in a column on the right, with some species names truncated or abbreviated. The tree is a black and white line drawing with a complex branching pattern.
